

My Science Camp SUMMER 2024

WORLD OF WONDERS SCIENCE CAMPS

What a great way to keep your kids engaged this summer with fun and inspiring science activities, Monday-Thursday. This year we are offering 4 Main Camps and 4 Jr. Camps, designed to activate those inquiring minds.

JUNIOR CAMPS

JUNE 10TH-13TH 4-DAY CAMP

Science Culinary Camp

Jr. Camp | Ages 5-7

Join us for an interactive science class tailored specifically for little scientists! If your young explorer has a passion for the kitchen, this camp is the perfect fit. Not only will they discover new and easy recipes, but they'll also have the opportunity to take home delicious treats to share and showcase their culinary creations. They will satisfy their curiosity and have fun while whipping up some tasty delights!

JUNE 19TH-20TH - 2 DAY

Tiny Biologists Discovery Camp

Jr. Camp | Ages 5-7

Biology is the scientific study of life. This camp will be a brief introduction to the fascinating world of biology where little scientists will have the opportunity to explore various habitats, animals, other living organisms, and even bacteria. Additionally, they can immerse themselves in our 360 Digital StarLab to get an up-close look at the enchanting inhabitants within the vibrant coral reefs!

JULY 17TH-18TH - 2 DAY

Botanical Explorers Mini Camp

Jr. Camp | Ages 5-7

Embark on a botanical adventure with our little scientists as they delve into the captivating world of plants! Participants will discover the science behind plant life, engage in hands-on gardening activities, and even have the opportunity to take home seeds and plants to start their own gardens. Join us as we unravel the significance of plants for our environment and cultivate a deeper understanding of their role in sustaining life on Earth.

JULY 22ND-25TH - 4 DAY

Curiosity Unleashed Camp

Jr. Camp | Ages 5-7

Immerse oneself in our hands-on Curiosity Unleashed Camp, where young scientists will explore a wide range of scientific disciplines across various branches. This dynamic experience allows participants to experiment and discover which field of science resonates with them the most. Additionally, our camp features the captivating 360 Digital StarLab, adding an exciting dimension to the exploration of astronomy and space science. Join us for a journey of discovery to unleash your scientist's scientific curiosity!

MAIN CAMPS

JUNE 17TH-18TH - 2 DAY

Chemistry Exploration

Main Camp | Ages 8-12

Chemistry is a science subject that is considered one of the most interactive subjects of all. Experience the excitement of hands-on chemistry fun by joining us at the WOW. We delve into various experiments in our interactive WOW Lab, immersing your young scientist into the world of chemistry and helping them become a true chemist.

JUNE 24TH-27TH - 4 DAY

Innovators' Engineering Workshop

Main Camp | Ages 8-12

In this engaging engineering workshop, participants will have the chance to create, build, and demolish various objects and structures. They will learn the intricacies of constructing towers and bridges, unleash their creativity by designing captivating robot models, and delve into the world of circuits to understand their fundamental principles. Join us for an immersive experience where innovation meets hands-on learning!

JULY 8TH-11TH - 4 DAY

Galactic Explorer Adventure Camp

Main Camp | Ages 8-12

Embark on an exciting journey into space with our Galactic Explorer Adventure Camp, designed to captivate students with hands-on activities and experiments. Each day, participants will enter our 360 Digital StarLab, where they'll discover fascinating insights into stars, planets, moon phases, and the sun, enriching their understanding of the cosmos. Plunge into an out of this world experience that ignites curiosity and fosters a love for space exploration!

JULY 15TH-16TH - 2 DAY

Forensics' Investigator Experience

Main Camp | Ages 8-12

Lose oneself in an introductory journey into forensic science through engaging, hands-on lessons led by one of our knowledgeable WOW educators. Participants will probe into the world of fingerprints, counterfeit items, and the art of investigating for clues. Moreover, the WOW team has collaborated with a forensic science technician to provide scientists with an insider's perspective, enhancing the learning experience. Come join us for an unforgettable exploration of forensic science!
